

Nginx installation on RHEL 8

Step 1: Install – Update – Verify EPEL Repository

```
$sudo dnf install -y https://dl.fedoraproject.org/pub/epel/epel-release-latest-8.noarch.rpm  
$sudo dnf update  
$sudo rpm -qa | grep epel
```

Step 2: Install Nginx web-server

```
$sudo dnf install nginx
```

Step 3: Enable – start – Verify Nginx

```
$systemctl enable nginx  
$systemctl start nginx  
$systemctl status nginx
```

Step 4: Launch the web-server

```
Default port for nginx: 80  
http://YOUR_IP:80
```
